

Preparation Checklist

1. The moonwalk is an inflatable 15' x 15' and 20' tall. Please provide at least a 20' x 20' space with at least 15' of clearance from tree branches and other obstructions for the bounce house. Slides and waterslide need at least a 30' x 50' space with a 20' height clearance. This will create an open space around the bounce house for safety and to protect our equipment. We will not set up the moonwalk under or near any electrical or telephone wires. The moonwalk cannot be placed near a swimming pool.
2. Make sure there are no underground irrigation pipes and/or buried telephone cables or electric lines close to the perimeter of the bounce site. We will use 12" stakes to secure the moonwalk.
3. Clear the site of all sharp sticks, animal waste, large rocks and other large debris. If animal waste must be removed, please cover the spot to protect our equipment from residue. On hard surfaces like driveways or parking lots, please sweep the area clean.
4. The bounce site should be relatively level. No more than a 6 inch slope per 10 feet.
5. A standard 110 outlet within 100 feet is required for operation. It is best that the outlet not be shared with other large equipment.
6. Please be present at the time of delivery. Make sure a clear path of at least 3 feet wide is available for delivery of the moonwalk. If curbs, steps or stairs need to be negotiated, we will require the renter's assistance for delivery.
7. Ascension Party Rentals reserves the right to refuse rental if we deem the area to be unsafe or likely to damage or soil our equipment.
8. Thank you in advance for your cooperation. Have an enjoyable and SAFE jumpin' good time.
